

PRITHVIRAJ BHAGAVAN GADALE

Aspiring Business Analyst | Python, SQL, Excel & Power BI

Pune, Maharashtra | +91-7986703764 | gadaleprithviraj@gmail.com | [GitHub](#) | [LinkedIn](#)

20% faster reporting cycle | 15% gain in processing efficiency | 2 end-to-end BI dashboards shipped

PROFESSIONAL SUMMARY

Aspiring Business/Data Analyst skilled in Python, SQL, Power BI, and Excel, with hands-on experience building dashboards and delivering BI insights. Proven ability to translate complex datasets into actionable recommendations through insurance and pharmaceutical analytics projects, with exposure to commercial analytics use cases such as segmentation and KPI reporting.

EDUCATION

B.E., Information Technology — Army Institute of Technology, Pune

2023 – 2027 (Ongoing)

CGPA: 8.1/10 (through 6 semesters) | Latest Semester SGPA: 9.05

Relevant Coursework: Database Management Systems, Business Analytics, Data Structures & Algorithms, Statistics & Probability, Software Engineering

TECHNICAL SKILLS

Languages & Tools: Python, SQL, Microsoft Excel (Advanced), Power BI, Tableau, Power Query, DAX

Core Competencies: Data Cleaning, EDA, ETL, Statistics, Machine Learning, Data Visualization, Dashboard Development

Domain Exposure: Healthcare/Pharma Analytics, Insurance Analytics, Commercial Analytics & KPI Reporting

EXPERIENCE

Data Analytics Intern — CodeAlpha (Remote)

March 2026 – April 2026

- Mined complex datasets with Python, SQL, and Excel to surface key business trends, informing decisions for senior stakeholders.
- Engineered interactive Power BI dashboards that streamlined reporting and sharpened visibility into project KPIs across departments.
- Automated data cleaning and transformation workflows, cutting manual errors and lifting processing efficiency by **15%**.

PROJECTS

Insurance Data Analysis Dashboard

Power BI · SQL · DAX

- Engineered an interactive Power BI dashboard analyzing insurance claims, premiums, and customer segments to support risk assessment and underwriting.
- Applied data cleaning, SQL querying, and DAX to derive KPIs like claim ratio and average premium — cutting reporting lead time by **20%**.

Pharmaceutical Sales Analysis

Power BI · Power Query · DAX

- Designed a star-schema data model and transformed transactional pharma sales data into analysis-ready reporting.
- Delivered revenue, quantity, and coverage KPIs; analyzed regional/therapeutic-area performance to pinpoint top revenue contributors — directly aligned with commercial analytics use cases like segmentation.

Student Performance Analysis & Intervention Recommendation Dashboard

Python · SQL · Power BI

- Analyzed academic performance data across 1,000+ student records using Python (pandas) and SQL to identify performance gaps by gender, parental education, and test-preparation status.
- Defined KPIs (pass rate, at-risk-student %, score gap by cohort) and built an interactive Power BI dashboard enabling administrators to self-serve insights by segment.
- Delivered data-driven recommendations to prioritize academic support resources for at-risk segments, targeting closure of a 12-point average score gap.

CERTIFICATIONS

Complete Data Analyst Bootcamp — Udemy

- Built core competencies in SQL, Power BI, Advanced Excel, Python, and data visualization through structured, hands-on training.
- Applied Power Query, DAX, and SQL to execute data transformations and deliver business-ready analytical solutions.

ACHIEVEMENTS & LEADERSHIP

- Joint Secretary, Information Security & Digital Forensics (ISDF) Club — led technical initiatives and managed club operations.
- Organized TechFest workshops on Data Visualization and Cyber Security, managing logistics and participant engagement.
- Coordinated cycling and sports events; volunteered with National Service Scheme (NSS) on community outreach initiatives.
